Cascading Reels with Expanding Grid

Symbols fall into positions on the reels, instead of spinning.

One or more winning ways will start the cascading effect.

Winning symbols will be removed, remaining symbols will fall to the most possible bottom position on the reels.

A new cascade will start to fill up empty reel positions which can create additional wins.

Each cascade adds an additional row of symbols up to a maximum of 8 rows and 262144 ways to win.

Cascading will continue until no more winning combinations appear as a result of a cascade. There’s no limit to the number of cascades.

The rows are reset to 4 when a new round begins.

Wilds

Charged Wild

Charged Wild consumes a charge when it contributes to one or more winning combinations and is removed from the reels when it consumes all charges or at the end of the round.

Replicating Wild

Replicating Wild moves randomly upon landing, leaving a trail of Wilds behind.

Replicating Wild does not affect the Wilds and Scatter symbols; instead, it moves to the next position available.

The Replicating Wild is persistent between cascades.

Multiplier Wild

Multiplier Wild lands with random win multipliers of 2x, 3x, 4x or 10x.

If 2 or more Wild Multiplier symbols appear in a winning combination, then the corresponding multipliers are multiplied.

Random Wilds

Up to 10 Wilds are added to reels to create more winning combinations.

Charged Wild, Replicating Wild and Multiplier Wild do not participate during this feature.

Second Chance

When there are no winnings in a round, an entire row of symbols from the grid can be randomly removed to create more potentially winning combinations.

General rules - The Rodfather Megaways

The Rodfather Megaways is a MEGAWAYS™ instant game with up to 200704 winning ways featuring Free Spins with Unlimited Win Multiplier, Fishin' Time, and Mystery Symbols.

There are 6 reels and each reel can have a minimum of 2 symbols and a maximum of 7 symbols.

The number of symbols landing on each reel is selected randomly.

There is a horizontal row at the top and it always has 4 symbols and spins from right to left.

Each spin can have up to 200704 ways to win.

Changing the bet amount automatically changes the win amounts displayed in the paytable, those amounts are displayed in the currency you selected.

All symbols pay from left to right on adjacent reels starting from the leftmost reel.

Wins are awarded for left to right adjacent symbol combinations of any size.

For each symbol, multiply the number of adjacent winning symbols on each of the reels to get the total number of winning ways.

Then multiply the winning ways by the payout of the winning symbol from the paytable to get the total win for that symbol.

Add the total win of each winning symbol to get the combined total win.

The payout for each winning combination is equal to the value shown in the paytable.

While evaluating winning combinations, each symbol on the reel is counted once regardless of its size on the reel.

Only the highest win will be paid per winning combination.

If you have more than one win on a single spin, the total amount of your winnings is added together, displayed in the win field and added to your balance.

CASCADING REELS

Symbols fall into positions on the reels, instead of spinning.

Wins are achieved by getting 8 or more of the same symbol anywhere on the screen.

A winning combination will start the cascading reels feature.

Winning symbols will be removed, remaining symbols will fall to the most possible bottom position on the reels.

A new cascade will start to fill up empty reel positions which can create additional wins.

Cascading will continue until no more winning combinations appear as a result of a cascade. There’s no limit to the number of cascades.

RANDOM MULTIPLIERS

Random Multiplier symbols can land during Free spins.

When a multiplier symbol lands, it takes a random multiplier value from 2x to 100x.

Multiplier symbols stay on the screen until the end of the cascade sequence.

At the end of the cascade sequence, the values of all multiplier symbols on the screen are added together and the total win of the sequence is multiplied by the final value.

Wins from Free Spins Scatter symbols are not multiplied.

UNLIMITED FREE SPINS
